EPIDEMIOLOGY

SOURCE OF EVENT OR ORIGIN OF INFECTION

- Vectors
- Fomites (humans, vehicles, feed, etc.)

EPIDEMIOLOGICAL COMMENTS

On July 18, 2024, farmers informed the Tha Wang Pha District Livestock Office about suspected cases of Lumpy Skin Disease. The investigation identified two affected areas: Location 1: A beef cattle farm in Village 5, Yom Subdistrict, Tha Wang Pha District. The disease was first noticed on July 18, 2024, with 3 susceptible animals and 1 case. Location 2: A beef cattle farm in Village 2, Chom Phra Subdistrict, Tha Wang Pha District. The disease was first noticed on July 15, 2024, with 2 susceptible animals and 1 case. The investigation suggests that changes in weather conditions may have stressed the animals, contributing to the outbreak, particularly since the animals had never been vaccinated against LSD. Additionally, the farm is situated in an area with frequent vehicle traffic, which may have facilitated the spread of the disease. In response, the district livestock officer ordered the quarantine of affected animals and declared a temporary epidemic zone on July 25, 2024. Blood samples were collected for laboratory testing. The Upper Northern Veterinary Research and Development Center in Lampang Province confirmed the presence of LSDV in samples from both outbreak sites. The Tha Wang Pha District Livestock Office, in coordination with veterinary volunteers, has since vaccinated susceptible cattle within a 1-kilometer radius of the outbreak. They also worked with the Nan Animal Quarantine Station to disinfect and apply insecticide within a 5-kilometer radius.

QUANTITATIVE DATA SUMMARY

MEASURING UNIT

Animal

Species	Susceptible Cases		Deaths		Killed and Disposed of		Slaughtered/ Killed for commercial use	Vaccinated
cattle (domestic)	NEW	5	2	0	0	0	0	45
	TOTAL	5	2	0	0	0	0	45

DIAGNOSTIC DETAILS

CLINICAL SIGNS

YES

METHOD OF DIAGNOSTIC

Diagnostic test,
Clinical

Test name	Laboratory	Species sampled	Number of outbreaks sampled	First result date	Latest result date	Result
Real-time polymerase chain reaction (real-time PCR)	Upper Northern Regional Veterinary Research and Development Centre, Department of Livestock Development, Lumpang province	Cattle	2	2024/07/23	2024/07/23	Positive
